International application No.

PCT	/Δ	TJ2003/00	ነበ7ጸ1

I.	Basis of the report				
1.	With regard to the elements of the international application:*				
	X the international application as originally filed.				
	the description, pages, as originally filed,				
	pages, filed with the demand,				
	pages, received on with the letter of				
	the claims, pages, as originally filed,				
	pages , as amended (together with any statement) under Article 19,				
	pages, filed with the demand,				
	pages, received on with the letter of				
	the drawings, pages, as originally filed,				
	pages, filed with the demand,				
	pages, received on with the letter of				
	the sequence listing part of the description:				
	pages, as originally filed				
	pages, filed with the demand				
	pages, received on with the letter of				
2.	With regard to the language, all the elements marked above were available or furnished to this Authority in the language in				
	which the international application was filed, unless otherwise indicated under this item.  These elements were available or furnished to this Authority in the following language which is:				
	the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).				
	the language of publication of the international application (under Rule 48.3(b)).				
	the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).				
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international				
	preliminary examination was carried out on the basis of the sequence listing:				
٠	contained in the international application in written form.				
	filed together with the international application in computer readable form.				
	furnished subsequently to this Authority in written form.				
	furnished subsequently to this Authority in computer readable form.				
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.				
	The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished				
4.	The amendments have resulted in the cancellation of:				
	the description, pages				
	the claims, Nos.				
	the drawings, sheets/fig.				
5.	This report has been established as if (some of) the amendments had not been made, since they have been considered to				
	go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**				
*	Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).				
**	Any replacement sheet containing such amendments must be referred to under item I and annexed to this report				

V.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations
	and explanations supporting such statement

1.	Statement		1	
	Novelty (N)	Claims 1 – 28		YES
		Claims		NO
	Inventive step (IS)	Claims 1 – 28		YES
	· .	Claims		NO
	Industrial applicability (IA)	Claims 1 – 28		YES
•		Claims		NO

2. Citations and explanations (Rule 70.7)

The following international search report citations have been considered for the purpose of this statement:

D1: WO 99/43550 A

D2: US 5588285 A

D3: US 4676050 A

D4: US 4261158 A

#### Novelty (N) Claims 1-28

The claims are novel when compared with the citations none of which discloses that a temporaty cavity is formed in the container by the bottom of the container, the movable planar first restraining member, and the movable planar second restraining member, wherein, following the deposition of an object into the cavity, the first restraining member is withdrawn from its position and reinserted to take up a new position on the opposite side of the object and the second restraining member is then moved away from the first restraining member to create a new cavity for a further object to be deposited.

### Inventive step (IS) Claims 1-28

The claims involve an inventive step for the same reasons above.

## Industrial applicability (IA) Claims 1 – 28

The claims satisfy the requirements for industrial applicability.
